AUTOMOTIVE  
ELECTRICAL  
CONNECTORS

[www.teparts.eu](http://www.teparts.eu)

**Brand:** TE PARTS

**Country of origin:** Latvia

**Official website:** www.teparts.eu

Every vehicle has several hundred different plugs, connectors and sensors. Technological progress is increasing the demand for quality electrical components.

TE PARTS – company, whose main field of activity is production and trading of electrical components. For over 15 years, TE PARTS has been providing the automotive industry with OEM quality spare parts. Raw materials and components from carefully chosen suppliers are being used to ensure that quality of parts is equivalent to original equipment - products allow save money without compromising quality.

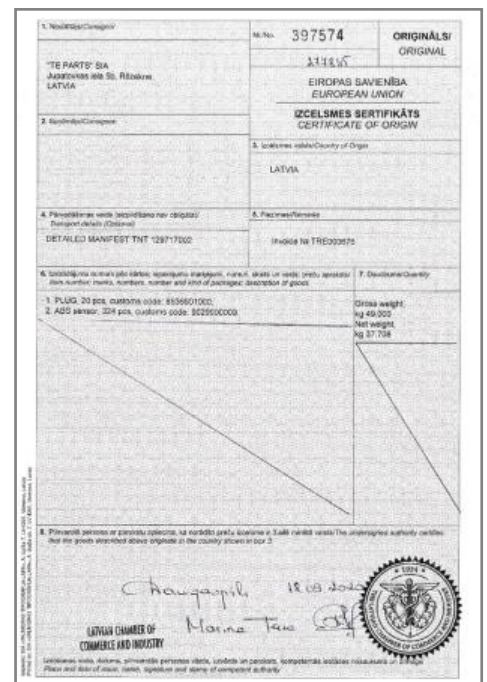

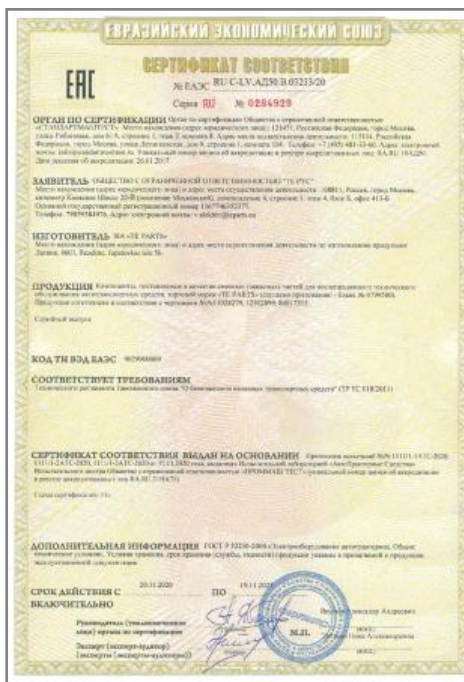

**TE Parts - Quality without compromise.**

High-tech production equipment, manual assembling and three-stage quality control guarantees customer satisfaction. Quality is confirmed by TUV NORD and EAC certificates and quality reports from partners.

To date, the range of products presented consists of four groups of products, consisting of several tens/hundreds of items. Assortment of spare parts is constantly expanding depending on market requirements.

Products are supplied in complete set: ABS sensors complete with grease and bush, connectors and plugs complete with terminals, seals, elastic bands and etc.

The main principles of the company regarding customer service are expertise, responsibility, decency and respectful attitude. TE Parts pays special attention to customer satisfaction, quality, reliability, warranty rules and price stability that's why TE Parts is trusted in almost 30 countries.

## INSTRUCTIONS

for pressing the tip (PIN) and the sealing sleeve with the wire

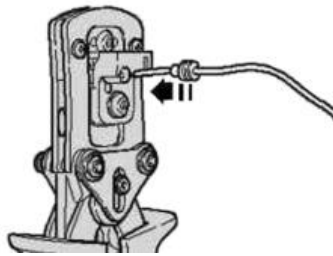

Installing the sealing sleeve

Install the sealing sleeve on the wire.

### ATTENTION!

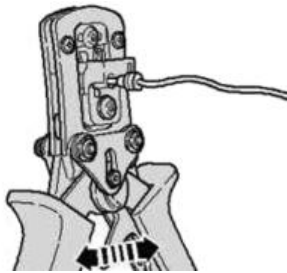

! The sealing sleeve is selected with an internal diameter according to the wire, so that the sleeve is installed with little resistance.

! The smaller outer diameter of the sealing sleeve has to be on the side of the tip.

Installation of wire in crimping plies

1. Open the crimping pliers and insert the end of the wire into the hole for stripping of isolation
2. Fully squeeze the pliers.
3. Re-open the pliers and remove the stripped wire.
4. Slide the sealing sleeve sleeve to the stripped end so that it ends at the same level as the wire isolation.

Installing the wire with sealing sleeve in crimp terminal

5. Insert the stripped end of the wire with the aligned sealing sleeve in the crimp tip.
6. Press the tip, wire and sealing sleeve at the same time, fully compressing the crimping pliers.
7. Re-open the pliers and remove the assembled plug element.

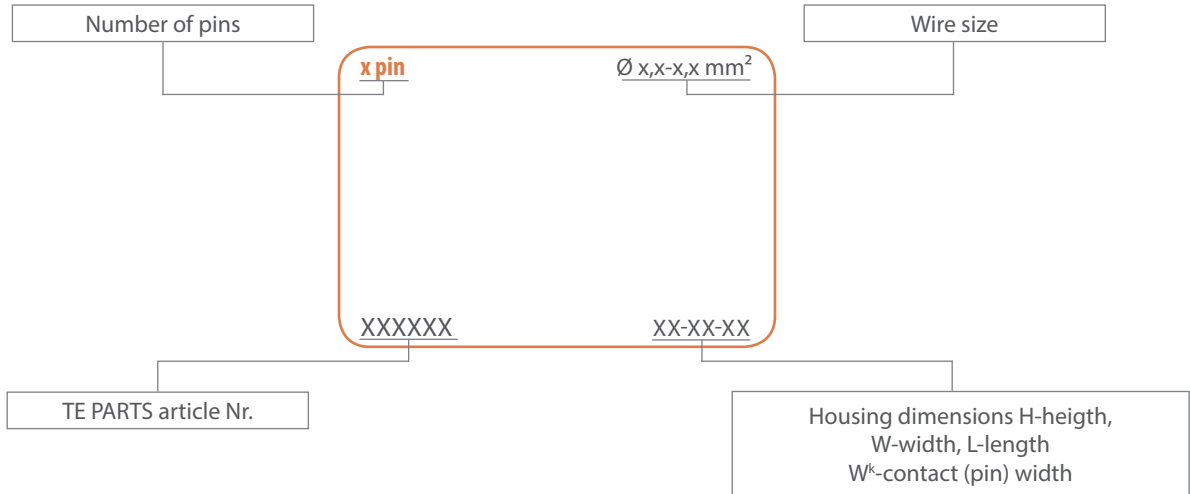

Example of correct crimping of the wire

### ATTENTION!

! Correctly made crimping does not allow the wire and the sealing sleeve to move on the tip.

! During assembly of the plug, this correctly assembled element, ensures a good tightness of the plug, in general, and fulfillment of compliance with the TUV NORD certification requirements.

Bevola Norge AS  
Ligandnes 110  
NO - 2022 LARVIK

---

**Final report**

**Dear Sirs,**

We have now ended the test of your sensors (TE PARTS article - 10328080 - 0.4m angled) and the company Bevola do not need more test time, the sensors is doing fine and after inspection the quality is up to our standard requirements.

Test trailers have been running aprox 200.000 km and we have had no ABS indication so far.

Operation of the trailers are Swedish timber trailers.  
If you like we can return the some of the sensors to you if you like to see them.

The warranty we get from our supplier today is 12 month, no mileage. Technical failure only, but including inside corrosion.

**Bevola buys from our supplier ABS kit including:**

- 1 sensor, 1 bushing
- 2 stainless bolts
- Fitting bracket

Sincerely,  
Stefan Nilsson  
Produktchef avdel
