## Announcement about EAC2.5 – Bayonet Cartridge Design Change

**Hereby Knorr-Bremse would like to inform you about a visual product change on the Bayonet Air Dryer Cartridge for the EAC2.5 – equipped in Volvo and Renault vehicles**

This change is part of the ongoing product development and in alignment with customer requirements.

The new design does not affect the function of the air dryer cartridge and is fully backwards compatible to all previous EAC2.5 generations. In fact, with the new design comes an improvement on the snap-lock connection on the container and the two green banderole straps are no longer required. Therefore, the new design reduces packaging material and saves time in the workshop when exchanging the cartridge on the EAC2.5.

Most importantly, due to only a visual change, the Knorr-Bremse part number in the Independent Aftermarket is still valid and will not change. All customer orders remain without further notice. For the Bayonet Cartridge Kit, please refer to the well-known reference number K096837K50 also for future orders.

In the Knorr-Bremse packaging box, the cartridge comes with a main sieve and a locking screw, which should also be exchanged together with the air dryer cartridge. Details of available bayonet kits can be found on the next page.

Please be aware that until all customers have sold their current stock, a transition period of old and new design of the cartridge will exist.

### At a glance:

- › Bayonet Cartridge Kit Part Number stays the same
- › Functions exactly the same, fully backwards compatible to all EAC2.5
- › Visual change on the cartridge design only
- › No actions required
