**ampro**

# FIRST TO AFTERMARKET PRODUCTS

## **NO<sub>x</sub> SENSORS**

Patented technology, automated precision, and OE-proven reliability make AMPRO NO<sub>x</sub> Sensors a dependable choice for demanding applications. With broad and growing market coverage, we provide the right solution for a wide range of vehicles and systems. Extensive long-term testing ensures lasting performance you can rely on with confidence.

## **UREA PUMPS**

Built for harsh conditions, AMPRO Urea Pumps combine durable materials, improved filtration, and long-term leak-tight performance. Their energy-efficient, low-maintenance design reduces service needs while delivering reliable operation. Thoroughly tested for endurance, they are built to keep running.

## **DOSING MODULES**

AMPRO Urea Dosing Modules are developed in-house for precise injection, high efficiency, and dependable durability. A laser-optimized spray pattern improves injection quality, supports accurate distribution in the exhaust flow, and helps reduce urea consumption. Long-term testing ensures reliable performance after installation.

# AMPRO'S TOP BENEFITS

- OE-Proven Quality at Aftermarket Prices — Trusted by vehicle manufacturers and the Aftermarket, combining genuine durability and reliability with aftermarket value
- Market-Leading Coverage — 300+ NOx sensors covering the full range of commercial vehicle applications and all relevant passenger car applications
- Ready-to-Ship Availability — ~20,000 sensors in stock, ensuring reliable supply and fast dispatch, so customers can stock less and replenish on demand
- One-Stop SCR Sourcing — Aftertreatment components beyond NOx sensors, including Urea Pumps, Dosing Modules, Injectors, PM sensors, Urea Tanks, Additive Tanks and more
- Diagnostic-Backed Support — Deep in-house testing capability enabling real technical support and perfect sensor compatibility
- Agile Reference Expansion — Development, manufacture, and distribution model that accelerates rollout of new references
- Proven Long-Term Partner — Trusted by leading passenger car and commercial vehicle distributors for stable, long-term collaboration

## NEW PORTFOLIO ADDITIONS

### PM SENSORS & TANKS

AMPRO Particulate Matter Sensors, Urea Tanks, and DPF Additive Tanks are built for long-term reliability, so after installation, you can count on stable performance. Whether it is emissions control, urea supply, or additive delivery for regeneration, every AMPRO solution is developed for demanding conditions and dependable everyday operation. Durable construction, careful development, and extensive testing help minimize downtime, reduce service risk, and give you confidence where it matters most.
